### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The disclosure is objected to because of the following informalities: the status of the patent file should be updated on p. 1 of this specification.

Appropriate correction is required.

2. Claims 4 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The written specification does not appear to provide for a method of testing a pair of thin films that are other than conductive. Thus, use of the terms "whether" (claim 4) and "non-conducting" (claim 5) suggest steps that do not provide for a method of testing a pair of thin films.

3. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 4, how can "whether" (line 1) something is this or that be a "characteristic" (line 1), especially a "predetermined characteristic" (line 8 of claim 1)?

As to claim 5, how can "whether" (line 2) something is this or that be a characteristic" (line 1), especially a "predetermined characteristic" (line 8 of claim 1)?

4. As to claim 1's "method of testing a pair of thin films", note was made of the "atomic force microscopy measurement" and "for use as a contact material in a *switch*" (*italics added*) limitations in combination with remaining claim limitations.
